

SMART STORAGE

Smart Storage is an all-steel mini-storage building offered by Chief Buildings to help you meet your customers' requirements for speed and economy, without sacrificing strength or giving up options.

Available in 20, 30, and 40 feet widths, Smart Storage buildings can be configured in many different combinations allowing the most appropriate unit sizes for your tenants.

SMART CANOPY

Chief's Smart Canopy is a standardized 16'x11'-5" entrance complete with a workmanship limited warranty, standalone construction and available in several popular colors. As a simple, cost-effective solution for better protection from the elements and a more architecturally interesting building, building owners can now easily improve upon the style and function of their building with Chief's Smart Canopy.

SMART COMPONENTS

Chief offers a wide range of component materials at competitive prices. Smart Components can be ordered to ship with your Smart Building or can be shipped separately. This includes all Chief standard panels, C and Z-sections, bolting clips, miscellaneous bolts, screws, mastics and closures. Smart Components can be ready to ship in as little as 5 working days.

Chief Buildings is a leader in product, communication and service for the construction industry. With manufacturing facilities in Grand Island, Nebraska, and Rensselaer, Indiana, Chief designs and manufactures metal building systems for commercial and industrial applications to specific customer requirements. Computer-aided design, extensive engineering and manufacturing capabilities and unmatched customer service make Chief a recognized leader in low-rise building systems.

Galvalume® is a registered trademark of BIEC International, Inc.

Chief reserves the right to change designs, prices and specifications at any time without notice.

FAST, FLEXIBLE, COST EFFECTIVE....SMART!

CHIEF SMART BUILDINGS— KEEPING YOU ON THE FAST TRACK

Chief Buildings offers the perfect combination of economical, fast track building systems and the flexibility of custom design structures with our technology-driven Smart Buildings. Here are a few advantages a Chief Smart Building offers:

- TECHNOLOGY-BASED FAST TRACK PRICING & DELIVERY
- WIDE BREADTH OF SIZE OPTIONS
- FASTER CONSTRUCTION TIME
- LOW MAINTENANCE
- ENERGY EFFICIENT

Our Smart Series takes advantage of today's technology along with years of detailing and design experience to produce a wide range of solutions utilizing metal building components. We then back up this package with industry leading warranties and a company philosophy that takes customer service above and beyond when needed.

THE CHIEF ADVANTAGES

GRAY ELECTROCOATED STEEL

Our state-of-the-art electrocoating primer process protects our structural steel from corrosion and abrasion, adding greater longevity to the life of your product.

POLYVINYLIDENE FLOURIDE (PVDF)

Chief's finish is made with polvinylidene flouride resin, where a maximum of 70% of the resin is PVDF. This unique chemistry is combined with acrylic resin, as well as ceramic and select inorganic pigmentation. The result is a proven ability to resist ultraviolet radiation in sunlight for maximum protection against general weathering effects, chalking, and fading.

ENGINEER STAMPED BUILDING DRAWINGS

Provided upon request for any project at no charge, you can rest assured that Chief Smart Buildings will meet every specification your project requires—with no compromises in quality.

ALL STEEL BUILDINGS

Smart Buildings are complete steel structures that utilize 26 ga and 24 ga exterior panels of 80ksi grade to offer endurance and long-lasting value.

INDUSTRY CERTIFICATIONS

Chief Buildings is one of the elite manufacturers that are members of the MBMA, members of the MBCEA and accredited by the IAS. With these credentials, customers can count on buildings designed to the industry's highest standards.

OVER A HALF-CENTURY OF SERVICE

Founded in 1966, Chief Buildings continues to build on our reputation for manufacturing excellence and extraordinary customer service.
